

# ESPACE 8,00 and 9,60

**Benefit from the maximum reliability**  
of a large plastic greenhouse

Climate  
control

## ➤ The volume and height

of this greenhouse developed by BN greenhouses  
- CMF Group provides the necessary control  
for the proper development of your crops.

3.20m  
opening

Controlled aeration

## ➤ Perfectly sealed

In a perfect seal in the closed position, the 9.60 space  
and the 8.00 Espace allows you to better manage your ventilation  
through a roof opening ridge with geometry and positioning  
to initiate the ventilation and dehumidification cycle immediately  
upon opening.

**You will benefit from technical characteristics  
mastered by one of the greenhouse industry  
leaders. That's for certain!**

4.25m opening  
(50%)  
on the 8.00 version

## MODELS

### Espace 8,00m

### Espace 9,60m

## DIMENSIONS

Width (W)	8,00m	9,60m
Maximum mesh	2,50m	2,50m
Maximum row	5,00m	5,00m
Height to roof (F)	5,40 / 5,90 / 6,40m	5,60 / 6,10 / 6,60m
Height below gutter (Hsc)	3,5 / 4 / 4,5m	3,5 / 4 / 4,5m
Height below cultivation platform	3,35 / 3,85 / 4,35m	3,35 / 3,85 / 4,35m

## ROOFING

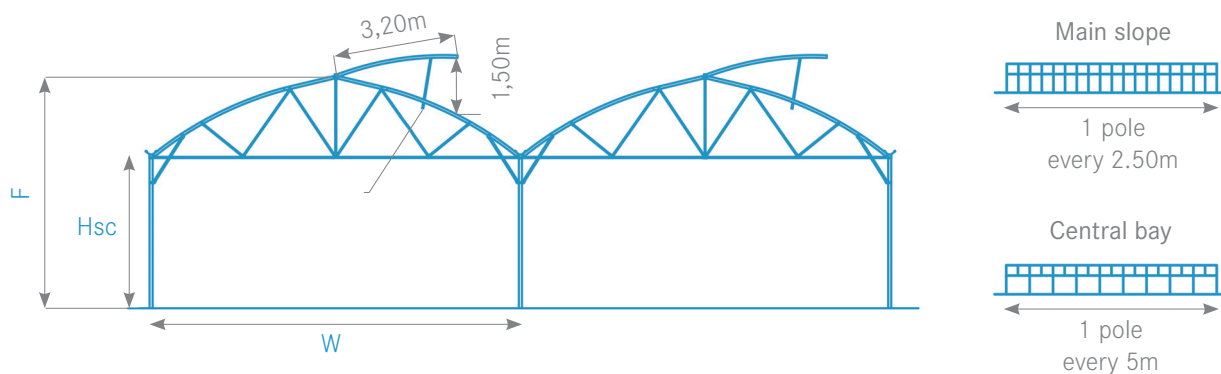

Single wall	Yes
Double inflated wall	Yes
Semi-rigid	Yes

## AERATION

Main slope hinge	By rolling/Main slope hinge opening/Guillotine opening	
Pinion hinge	By rolling	
Sur toiture	3.20m or 4.25m opening hinged to the roof	3.20 m opening hinged to the roof
	Gutter opening	

## DOOR TYPES

Aluminium steel and standard door:  
Width 3.20m x height 4.00m maximum  
(specific sizes are possible)

## Notes

- Wide section poles (90mm x 50mm) made of sendzimir Z 275 galvanised steel tubing: for improved solidity and stability.
- Diagonal rib roof: a perfect fit to reduce condensation.
- Tailored for shaded screen installation.
- An insect-proof system can be installed as standard.
- Structure meets the EN 13 031 European standard.
- Variable stabilisation modes according to climate load.
- Groupama specifications approved.
