DIMENSIONS

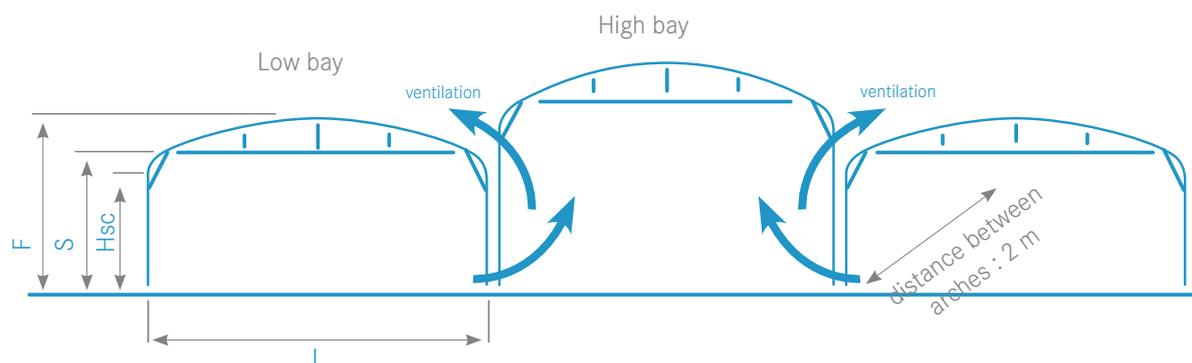

Width (L)	9,60 m	9,60 m
Distance between arches	2 m or 2,50 m	2 m or 2,50 m
Peak height (F)	4,86 m	4,06 m
Height under gutter (Hsc)	2,70 m	2,70 m
Height under crop support (S)	3,80 m	3 m

COVERING

Single film	Yes
-------------	-----

VENTILATION SYSTEMS

On longside	Height : 3,10 m	Height 2,30 m
	Cardan operated system	
On gable	Roll-up system	
On central bay	roll-up approximately 600 mm	

Observations

- Covering: Single film with a large choice of films adapted to the growing area and the crops.
- Crop loads 15 to 40 kg/m .
- Ventilation optimized with “Venturi” effect system.
- Optimal accessibility.
- Adapted for flower or vegetable production.
- Covering: Single film.
- Triangulations can vary depending on climate loads.
- Structure calculated according to the European norm EN 13 031.
