

SHADING - INSULATION SCREENING

Benefit

from technical solutions

Your partner
in shading

➤ To improve your crops, the experts at CMF

are studying a number of technical solutions in shading, heat shielding and screening for glass and plastic greenhouses.

Horizontal aeration
on straight legs

Turnkey
projects

➤ CMF offers you

a complete range of technical tarpaulins suited to your needs. Whatever your greenhouse type, our team of specialists will be able to fit it with a shading screen, heat shield or insect-proof net.

Operated
by track

SHADING - INSULATION SCREENING

➤ Mobile screens

- The screens operate in different modes:
 - horizontal,
 - split panels,
 - following inclines.
- Operation: by tracks, chains and cables.
- Hanging or supported tarpaulins according to requirements.
- Single screen or double screen.
- Tarpaulins for insulation, shading or screening according to your needs.

Heat screens allow for improved heat retention within the greenhouse.
An appropriate temperature is maintained and energy is saved.

INSECT-PROOF NETS

Insect-proof -
stretched on opening

Insect proof - slacking

➤ Protection

Protection against pest intrusion:

- Slacking system (adaptable to a number of greenhouse chassis models).
- Stretched on opening (CMF patent).
