CMF GROUP REFERENCE

CUSTOMER'S INFORMATION

- National Centre for Scientific Research at Moulis in Midi-Pyrenees
- Experimentation on natural flora according to climatic gradients for modelling global changes

KEY FIGURES

- Surface of 717 m²
- 12 cells and 1 preparation area
- Completion in 2011-2012

TECHNICAL FOCUS

- 16mm armoured and polycarbonate glass roofing
- Glass cladding with BAI substrate
- Semi-rolling shelves with low temperature in every cell
- Heating, cooling, photosynthesis and regulation

CMF GROUP FOCUS

- CMF responded to the researchers' expectations to deliver a working tool adapted to their needs
- Climate control by batch of 2 cells with conservation of the plant compartment
