

# A wide evolving range

| GREENPUSH   | WIDTH   | DISTANCE<br>BETWEEN POST | HEIGHT UNDER<br>GUTTER |
|---|---------|--------------------------|------------------------|
|  | 8,00 m  | 3,00 m                   | 5,00 m                 |
|   | 9,60 m  | 4,00 m                   | 5,50 m                 |
|   | 12,80 m | 5,00 m                   | 6,00 m                 |
|   | 16,00 m |                          |                        |

The design of the **GreenPush** plastic mutispan greenhouse makes it possible to consider larger widths. And the same is true for the heights under gutter and under peak. These dimensions allow to imagine new cultivation methods, and new production types.

## Increasingly efficient finishes

New attachments, new brackets, allow to set up the **GreenPush** plastic greenhouse faster, with greater efficiency, with a better finish quality.

## Gains at all levels

- Quicker assembly
- Optimization of steel thanks to its design
- Increased productivity for same investment
- Possible evolution of the crop production tools (suspended, vertical, multi-stage crops...)

**Eco-friendly  
solution**

*Energy and water  
consumption under control*

**Sustainable  
production**

*Yield, food quality and security*

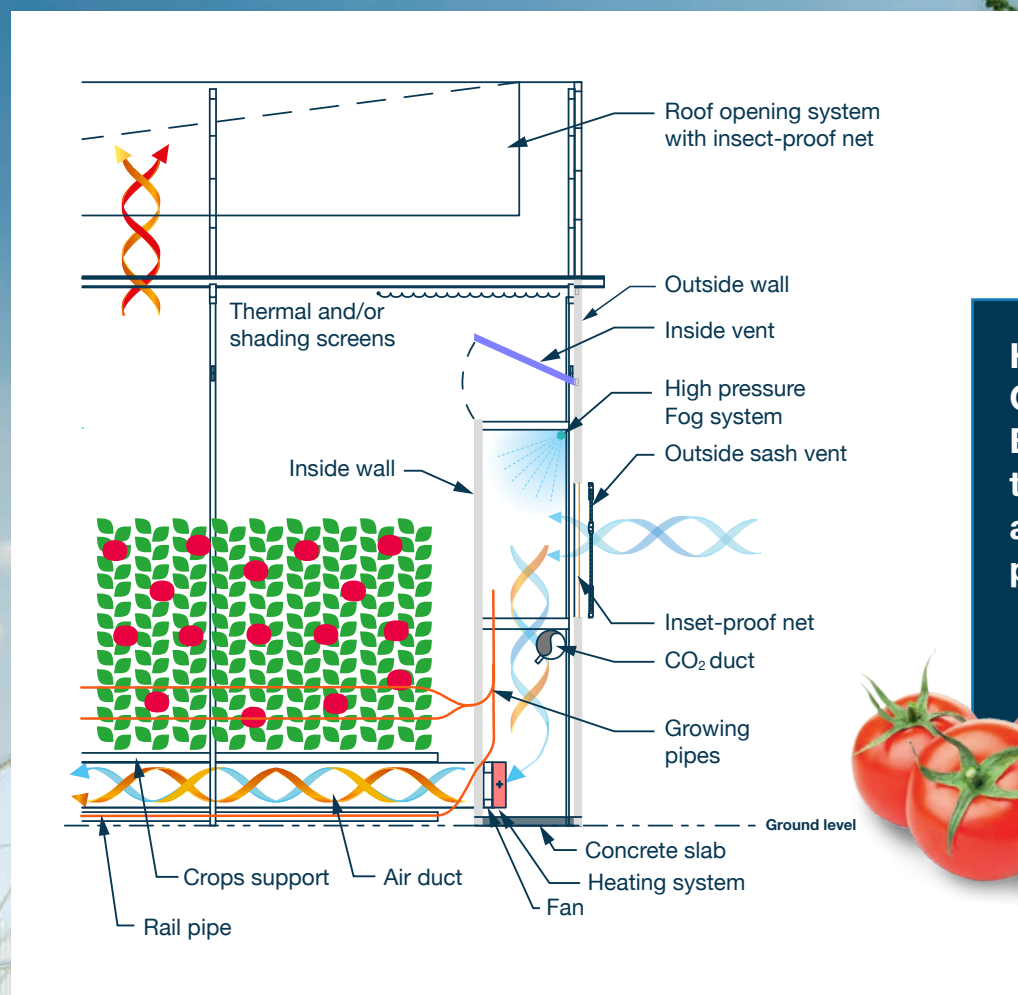

**For a controlled  
climate**

*High precision control of  
temperature, humidity and CO<sub>2</sub>*

**Environment-  
friendly solution**

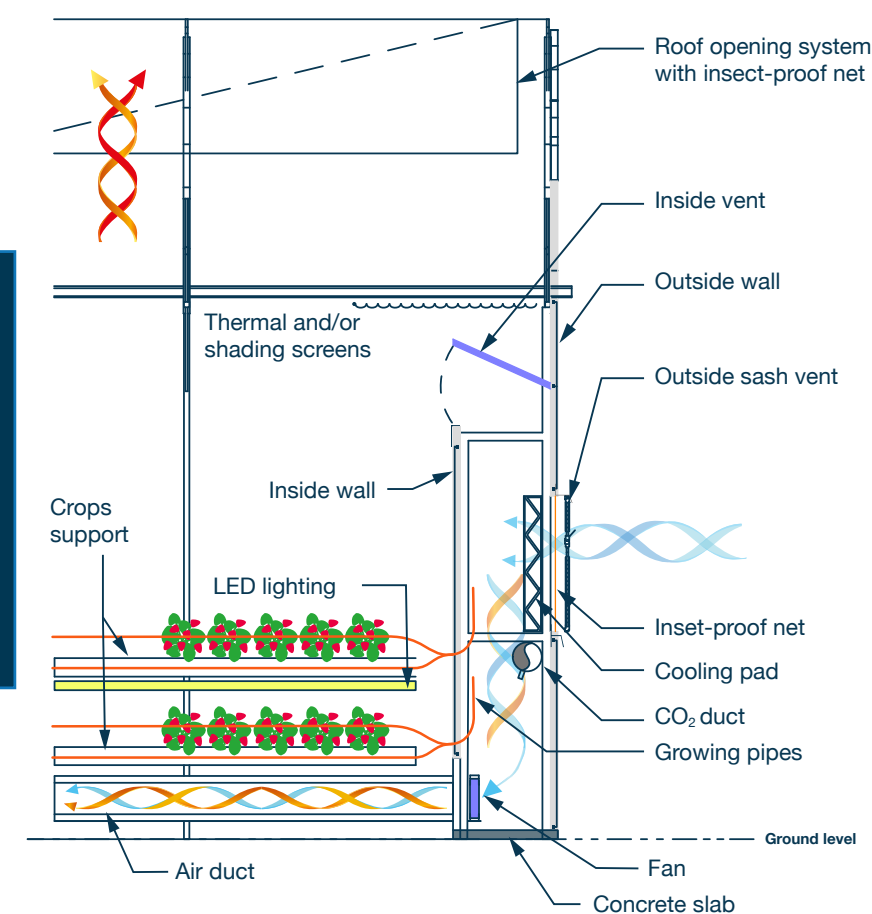

*No pesticide, No insect pest*

**How does  
GreenPush  
BioActiv work for  
tomatoes, peppers  
and cucumbers  
production ?**

**How does  
GreenPush  
BioActiv work  
for strawberries  
production ?**

## Semi-closed plastic greenhouse **GreenPush BioActiv**

With GreenPush BioActiv, CMF keeps developing the technology of plastic multispan semi-closed greenhouses. GreenPush BioActiv has been designed to control climate and insure protection against insect pest and diseases.
